

“ we are passionate about design ”

**Behind The Scenes.**

At our Newport HQ.....South Wales.

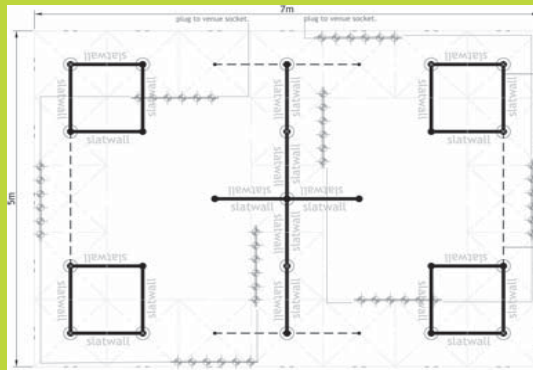

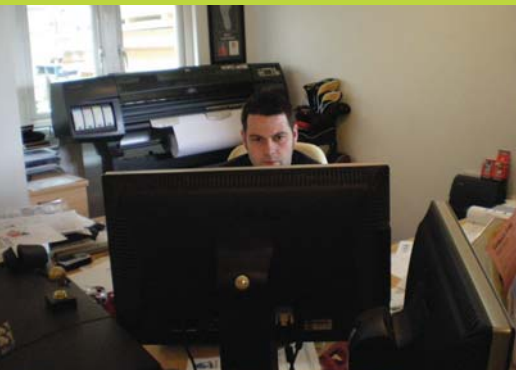

**Design.**

Our Design department is very much at the heart of our company. We place a big emphasis on design and invest a huge amount into it, both in terms of funding for the latest technologies as well as time to continually keep abreast of the latest trends and materials.

Our design studio is equipped with the latest cutting edge software to produce life like three dimensional visuals using the likes of 3D studio MAX and Sketchup. Two dimensional layout drawings for production and for client / venue approval alike are carried out using Autocad.

We can equally take care of our clients artwork for the large format digital printing that are an integral part of all exhibition stands. Using Illustrator, Photoshop and Indesign we are fully set up to prepare and undertake the production of such material.

Our design studio is run by Paul Stewart, an exhibition stand designer for over seven years now Paul has the necessary experience that coupled with natural design flair makes his conversion of briefings into reality very enviable. Paul is equally at home in web design and graphic design and takes all credit for our recent re branding and new web site.

We are passionate about design, we never cut corners into rushing design concepts. All of our designs are fully thought through to ensure we have maximised the brief whilst remaining conscious of budget and reality.
